

TOAD

→ TOAD : Tool For Oracle Application Developers

* TOAD is a Database management toolset developed by Jim McDaniel in mid of 1990, to support Oracle DB.

* Then QUEST acquired TOAD in 1998.

* QUEST updated TOAD to support MS-SQL server, DB2, MY SQL.

→ FEATURES OF TOAD FOR ORACLE

1 F9 is a function key to execute the SQL query

2 F4 is a function key to see the table structure and click on data it gives you constraint details.

3 To save the query for reference purpose → 'Go to save'.

4 To execute saved query go to load

5) session → END condition

→ NOTE :

* TOAD and SQL DEVELOPER are not a database they are just an interface.
