Self Introduction

Hi,

As you know my name is ----YOUR NAME-----, I am having 4.5 years of experience in IT industry, in that 4years as ETL tester and remaining as manual tester.

Recently I have worked in NTT DATA Information Processing Services Pvt. Ltd, Bengaluru and workedon Albertsons Retail Domain project, the client name is Albertsons it's from United States.

In that project,

- I have used Oracle as Database,
- SQL as to write queries and to validate data,
- Informatica as ETL Tool,
- HP ALM as Project Management Tool (Bug Tracking Tool). (Application Lifecycle Management)
- TOAD is used as data accessing.

Role: The Role in my last Project as Software Testing Engineer.

And responsibilities are:
- First I go through the technical documents such as source target mapping (STM).
- Then I have understood the client requirement and come up with high level scenario.
- Then I have developed the test cases and those test cases are undergone pear review.
- Once the test cases approved by Team Lead, we have uploaded in HP ALM.
- Once build deployed in testing environment, we start executing test cases.
- If any deviation between actual and expected result then I have raise the bug report to particulardeveloper and I have follow-up until to it has resolved.
- Even I have part of all calls like scrum call, client call, Standup call, weekly call and monthly call.
- At end of the day (EOD), I have submitted the daily status report to team lead

And my Daily Activities are:
- Once I login, I go through the outlook if any response required I will reply.
- I involve in stand-up call where team members update ourselves regarding project status like whatI did yesterday and what I have to do today and is there any obstacles.
- Then I carry test activities.
- I also involved in scrum calls and client calls.
- At the end of the day (EOD), I have submitted the daily status report to team lead
